

Incorporating Technology to Improve Outcomes

Your wellness program. Your way.

www.wellnessworkdays.com

Wellness Workdays Platform

Wellness Workdays' innovative, proprietary technology embeds well-being into the culture of your organization and empowers flexibility through customization, rapid deployment, unlimited scalability, and increased efficiency to meet the needs of your organization's business and wellness goals.

Rapid deployment, unlimited scalability, and increased efficiency.

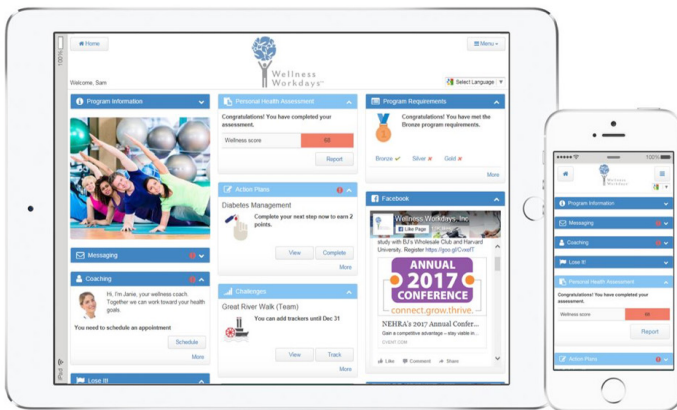

Wellness Workdays provides a single, easy-to-use web-based portal designed to provide your employees with a comprehensive wellness program which can be accessed from a desktop, mobile device, or tablet. Single-sign on capabilities allow for seamless integration to your network.

✓ Our Platform

Supports any type of health and wellness program and integration from other vendors, partners and health trackers with full customization.

✓ Our Portal

Achieved HITRUST Common Security Framework (CSF) certification, the highest certification in the industry, and can manage existing programs and onboard new clients with minimal setup time.

HITRUST
CERTIFIED

For Population Health & Wellness

Wellness Portal

- Provides access to all components from any device—PC, tablet, or smartphone
- Communicates participant program requirements, wellness targets, and incentive status

Incentive Management

- Supports incentive programs based on participation, results, and qualifying activity
- Manages reasonable alternatives and medical exemptions
- Consolidates program data from multiple vendors
- Provides real-time incentive status to participants and administrators

Biometrics Management

- Consolidates data from multiple screening vendors
- Supports entry at health fairs, from central labs, and from physician forms
- Provides real-time access to results
- Supports specific program requirements through configuration

Health Coaching & Documentation System

- Automates stratification and eligibility for coaching
- Enhances the coaching encounter by providing the coach real-time access to program data
- Supports online scheduling, secure messaging, and goal setting with participants
- Provides the flexibility and control to use multiple coaching vendors and resources

Self-Service Program Administration

- Provides program management to set up and support each end client
- Supports reporting and data management for managing projects and reporting data
- Manages data exchange
- Controls access to data and functions based on class of administrator
